

## **ACID RINSE AID**

### **DESCRIPTION**

This rinse additive is formulated to work in all types of automatic rinse injectors as well as manual feeding and immersion systems. Its use will help prevent water spotting on cleaned flatware and dishes. Aids in preventing spotting caused by water impurities such as hardness and dissolved solids left behind after water evaporates. Special conditioning agents reduce surface tension to provide rapid draining and rinsing; thereby speeding air-drying. It also controls foaming over a wide temperature range and suspends solids to prevent redeposition.

### **INSTRUCTIONS**

Due to varying machine cycles and settings consult your sales representative for specific instructions on application set up and adjustments.

### **FEATURES**

- ✓ Controls water spotting
- ✓ Controls foaming and redeposition
- ✓ Can be used in all temperature machines
- ✓ Versatile use in most any type system
- ✓ Biodegradable
- ✓ Corrosion inhibited
- ✓ Super concentrated
- ✓ Nonflammable
- ✓ Works well in hard or soft water

### **SPECIFICATIONS**

Appearance: Blue Liquid  
Odor: Bland  
Specific gravity: 1.01

pH: 2.0 - 3.0  
Detergency: None  
Biodegradable: Yes  
USDA Approval: Yes

### **SAFETY**

Keep this and all chemicals out of the reach of children! Product may be harmful if swallowed. In the case of eye contact consult physician immediately. Always wash hands completely after the use of this and any chemical.
