

NASS

DESCRIPTION

This product is an extra heavy duty non-ammoniated, alkaline based, wax and finish remover. This product removes even the toughest of buildups of wax and finishes, with speed and ease. This product is a very effective cleaner when used against oily and greasy soils. This product is recommended for use in areas where no scrub strippers are needed to remove heavy finish buildups, such as in office buildings, supermarkets, industrial plants and doctors offices. At 4 to 1 dilutions, this product will strip most finishes with ease and allow for easy removal.

INSTRUCTIONS

When cleaning heavy wax or finish from floors, use this product at 1 part stripper to 1 part water. For lighter jobs, this product may be diluted up to a 1-part stripper to 8 parts water. Make sure entire area is covered by water to ensure complete contact with solution. After allowing product to soak for about 10 minutes floor may be mopped or scrubbed to remove finish and stripper, it is not always necessary to rinse after using but for best results with all products, rinsing is recommended prior to applying finish or floor sealers.

FEATURES

- Works well on all surfaces
- Works in all types of water, regardless of hardness
- Non-Ammoniated
- Wash and rinse water may be hot or cold
