Green Liquid Laundry Detergent GL-180

DESCRIPTION

This is a non-built liquid laundry detergent. **All components are biodegradable and recognized as safer for the environment by the EPA/DfE program.** It is designed to be equally effective in hot or cold water. This detergent is formulated only for multi-component automatic dispensing systems where the toughest, most troublesome laundry problems exist. This product contains, fast acting cleaning agents, and is effective on natural and synthetic fibers. This detergent is highly concentrated for use in hotels, motels, schools, hospitals, and nursing homes. It also provides a thorough cleaning by preventing re-deposition of particulate, which can cause discoloration and break down in the strength of fabrics. Cleaning is provided through the use of modified detergents rather than strong alkaline booster compounds.

INSTRUCTIONS

Always follow garment manufacturers general washing instructions to retain quality of garment. This modern controlled suds formula is designed to act quickly to break down stubborn dirt grease and oils. For general laundry usage use approximately 3 ounces per load for larger loading machines or for heavier soiled loads use 4 ounces per load. Automatic dispensing units are most widely used today for simplicity, due to the fact that they are programmed to deliver exactly the amount needed for different sized loads and solid levels. In most cases, the average 50-pound commercial machine will require 4 to 8 ounces per load.

FEATURES

- EPA/DfE recognized for safer chemistry
- Works well in high efficiency machines
- Economical highly concentrated
- Formulated for multi-component systems
- Contains anti-redeposition ingredients
- Cleans with modified detergents
- Controlled suds for easy rinse
- Quickly breaks down greases and oils
- Rinses freely and completely

SPECIFICATIONS

Appearance:	Clear Liquid
Odor:	No Perfume
Specific gravity:	1.02-1.06
pH:	9.0-10.0
Detergency:	Excellent
Rinsibility	Complete
Foam	Controlled
